

### RESEARCH INTERESTS

- Data-driven and human-centered decision-making
- Supply chain and transportation management
- Nonequilibrium statistical physics and information theory

#### **EDUCATION**

## The University of Hong Kong (HKU)

Hong Kong, China

M.S. (Eng) Industrial Engineering and Logistics Management

Sep 2024 - Now

• RELEVANT COURSE

Relevant Course: Operational Research, Data-driven Optimization, Logistics and Transportation Systems

### Beijing Normal University (BNU)

Beijing, China Sep 2020 - June 2024

#### B.S. System Science and Engineering

• RELEVANT COURSE

Mathmatics, Physics, Systems Engineering, Systems Optimization, Game Theory, Agent-based Modeling, Dynamic System analysis, Artificial Intelligence

Convergence of complex dynamic networks based on Vicsek model (Excellent Graduation Thesis, Advisor: Prof. Zengru DI)

### Beijing Normal University (BNU)

Beijing, China Sep 2020 – June 2024

B.Ec. Finance

RELEVANT COURSE

Statistics, Micro- & Macro-economics, Econometrics, Finance, Accounting

Credit risk of blockchain-driven supply chain finance enterprises based on MCDM (Excellent Graduation Thesis, Advisor: Prof. Lei CHEN)

# RESEARCH EXPERIENCES

# Identifying extreme precipitation using nonequilibrium thermodynamics

Sep 2021 - May 2024

Advisor: Prof. Ying TANG, School of Systems Science, BNU

- o Developed and applied an integrated framework using the Landau distribution and large deviation theory, resulting in improved modeling of extreme precipitation events across global locations. This approach yielded a 10% to 20% increase in accuracy compared to conventional distributions.
- o Applied large deviation theory to compute return times for extreme events and forecast future precipitation scenarios, enabling predictions of events up to 5-10 times beyond average precipitation levels with 95% confidence.
- Strengthened proficiency in advanced statistical methods and data analysis, developed skills in applying complex mathematical models to real-world environmental challenges, and improved my ability to synthesize interdisciplinary approaches for solving critical problems.

# Examining Drivers of Green Supply Chain Management

Sep 2022 - May 2023

Advisor: Prof. Zengru DI & Prof. Keqiang LI, School of Systems Science, BNU

- o Conducted mixed methods research including literature analysis, qualitative interviews, and mathematical modeling to identify key determinants driving the adoption of green supply chains in the electronics industry.
- o Developed an original conceptual framework, leveraging MCDM techniques to examine the interrelationship among the drivers and their relative importance.
- Led comprehensive review of scholarly literature, primary data gathering through stakeholder interviews, advanced statistical analysis, and dissemination of novel findings.

- o Designed an integrated benchmarking model, utilizing MCDM methods to systematically assess and rank airline service performance.
- Compiled a dataset elucidating multifaceted service attributes and consumer predilections by scrutinizing survey responses from over
  500 patrons, manuscripts, and journalistic expositions.
- o Performed multivariate analysis, operations research, decision modeling, and insightful interpretation of results.

### **WORK EXPERIENCES**

### **E-commerce Supply Chains Optimization Project**

Position: Research Assistant (Advisor: Dr. Yung Po TSANG),

Hong Kong, China Sep 2023 - Mar 2024

Department of Industrial & Systems Engineering, The Hong Kong Polytechnic University

- Led research on DAO barriers in e-commerce supply chains, authored SCI papers, and presented research results at international conferences.
- Identified 12 key DAO implementation factors, integrated Bayesian theory and game theory to develop algorithms, and elucidated and visualised the intricate relationships and hierarchies of potential barriers.
- Coordinated a cross-functional team of four researchers, engaged in liaising and consultation with over ten researchers, and enhanced cooperation and coordination capabilities.

### Process Identification and Optimization Project

Position: Process and Supply Chain Management Coordinator,

Dongguan, China Jul 2023 - Sep 2023

#### Mentech Optical & Magnetic Co.,Ltd (002902.SZ)

- Leveraged complex networks analysis and predictive modelling techniques to pinpoint process optimization opportunities and formulate risk mitigation strategies.
- Forged collaborative relationships with cross-departmental teams to deploy process enhancements and execute targeted "Project Velocity" to curtail lead times for a specific product by 10% and trim inventory expenses by 5%.
- o Constructed intuitive data visualizations and dashboards to lucidly communicate supply chain metrics and trends to executive leadership.

#### **PRESENTATIONS**

0	12th International Conference on Complex Networks and their Applications, Menton, France (Poster)	Nov 2023
0	18th China Conference on Complex Networks, Zhuhai, China (Presentation)	Nov 2022

#### **AWARDS**

0	99 YUAN CHUAN Scholarship, BNU (4 / 150)	2023
0	Academic Scholarships, BNU (50 / 3000)	2023

# **COMPETENCES**

LANGUAGES

Chinese (native), Cantonese (native), English (C1)

TECHNIQUES

Data analysis in C, MATLAB & Python, and Word process in LaTeX & Microsoft Office
